SINCE 200 YEARS A RELIABLE WORKMATE

We monitor and document the entire process chain using state-of-the-art software systems and are certified according to DIN EN ISO 9001:2015. Ecological aspects are always taken into account when selecting materials and manufacturing processes.

Our company has been awarded the BSFZ seal by the Research Allowance Certification Authority (BSFZ). The BSFZ seal serves as proof of innovative activities within the meaning of the Research Allowance Act and shows that our projects contribute to technological advancement.

We are a member of the VEA initiative 'Climate-friendly SMEs'. The initiative supports companies in implementing measures to reduce CO₂ emissions and improve energy efficiency, thereby making an active contribution to climate protection. With this membership, we are setting an example for sustainable business practices and responsible action.

FROM THE **IDEA** TO THE **MARKET LAUNCH**

Development

According to your specifications, we develop practical and cost-effective solutions. We guarantee a continuous improvement process during the development and design phase of your products.

Mold Design

We can handle all common 3D Data and you will get a proposal feasibility study for improvements regarding design and cost reductions. Laser generated mold inserts tempered with special units up to variotherm units is our standard. Our mold document management will guarantee a complete Mold history.

Mold Shop

With using state-of-the-art technologies, we achieve the highest precision in our own Mold shop and with our asian partners as well. We produce molds to customer all over the world, including after sales service. Our asian Moldmaker is supporting us to each customer request.

Part Production

In our injection molding area we can handle all thermoplastic and duroplastic resins from 1 g up to 5000 g part weight.

Marketing

We support your sales with professionally prepared product and application images and product videos. We also work with you to develop a design concept for your private label items.

FROM LOHNE TO THE WORLD

Since 1825, Kronen-Hansa has been synonymous with high-quality tools for craftsmen. Today, these tools are exported to more than 40 countries.

SERVICES WE OFFER

- Product design
- Tool design
- Complete Mould flow analyses
- Toolmaking Germany
- Toolmaking Asia
- Injection moulding 1K/2K
- Processing of thermo- and duroplastics
- Processing Polyurethane
- Assembly of modules
- Pad printing process
- Automotive Quality management
- Project management worldwide

200 JAHRE

**KRONEN
HANSA**

1825

The Krogmann brothers establish a pen nib factory in Lohne.

Gegründet 1825

1861

Start of brush and paintbrush production

1960

Start production of paint rollers and worldwide distribution of the Kronenpinsel brush

1969

Founding of Hansaform and start of production of construction tools made of PU and plastic

1975

New building on the Rießel - 150th anniversary

Kronen-Pinsel-Fabrik
GEBR. KROGMANN & CO.

1982

New construction of an injection molding production hall for newly developed hand tools

1989

Merger of Kronen-Pinsel and Hansaform to form Kronen-Hansa-Werk GmbH & Co. KG

1990

new office building

2000

Establishment of a modern mold manufacturing facility

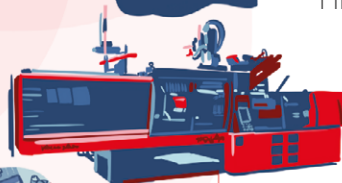

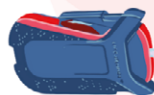

2004

First major customer projects in the technology sector

2006

Discontinuation of the painting tools

2025

200 years of existence

**KRONEN
HANSA**

2017

modernization and expansion of plastics production

TOPLINE -SOFTGRIP

Features:

Functional and comfortable, lightweight and easy to grip, suitable for plaster and screed, particularly sturdy surface promotes long service life, low abrasion, dirt-repellent. Available in various colour combinations. The 2K soft grip makes the board comfortable to hold and also ensures a non-slip grip. Even during prolonged use or under demanding conditions, the grip reduces fatigue.

With viscose-sponge, very absorbent
For washing/cleaning of floor tiles after
granting with epoxy grouting, slotted for
increased dirt pickup

Unit	Dimension cm	Support Thickness mm	Order No.
40	14 x 28	30	49 51 428

TILE WASH-FLOAT „DIAMOND PATTERN“

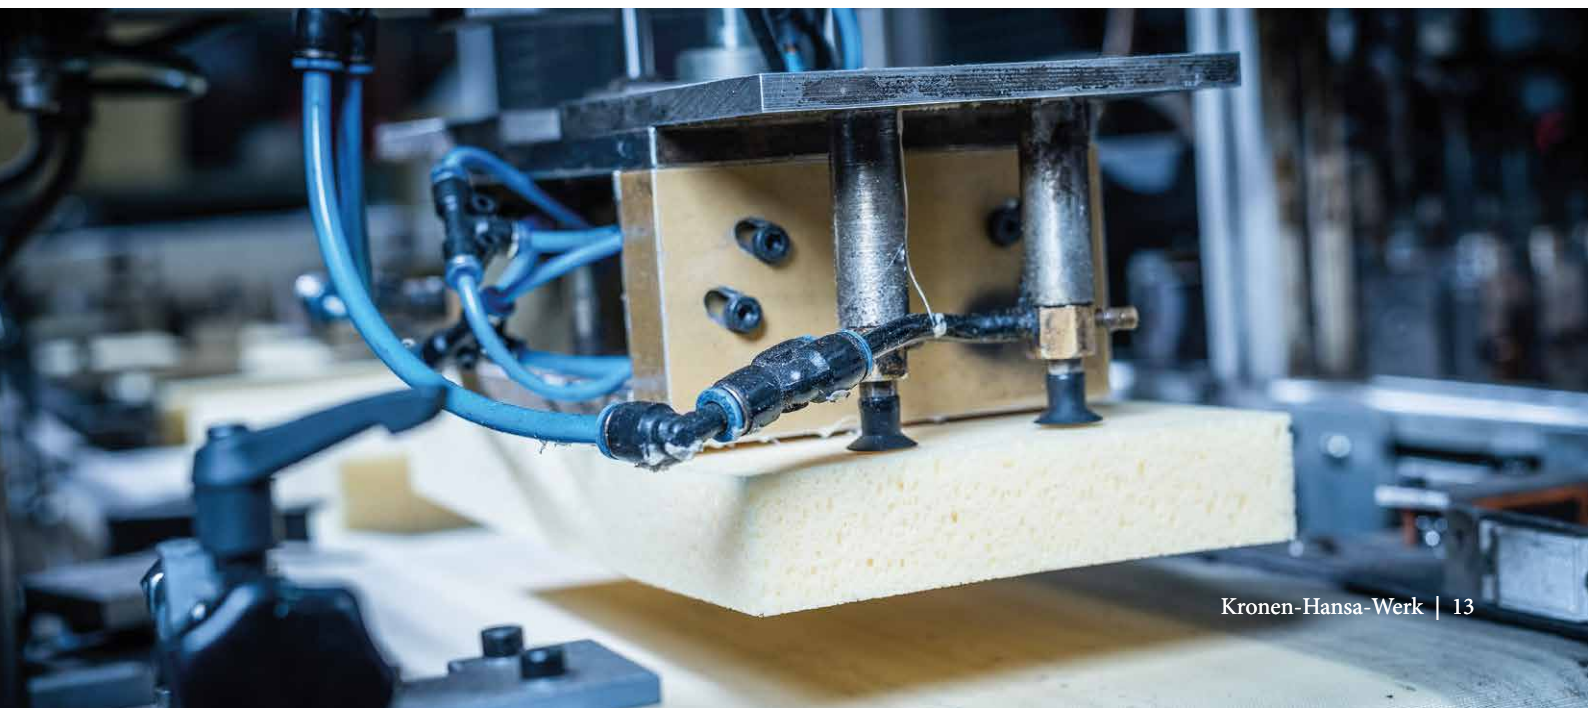

With “Hydro” sponge support, with di-
amond pattern, extremely high dirt ab-
sorption, closed edge prevents streaking
during washing

Unit	Dimension cm	Support Thickness mm	Order No.
40	14 x 28	35	49 21 428

TILE WASH-FLOAT „RUSTICA“

With Hydro sponge support, nabby, cle-
ans faster and more effective, for all tiled
floor areas, particularly suitable for rough
and profiled floor tiles (for example: ter-
racotta)

DESIGN-LINE FLOATS

Our DESIGN-LINE SERIES combines sophisticated design with high functionality. The characteristic offset handle with coloured insert not only ensures a modern appearance, but also ergonomic handling. Thanks to its special shape, the tool fits comfortably in the hand and enables fatigue-free working – even during longer periods of use.

DESIGN-LINE products are available with different pads that are optimised for various applications and permanently bonded. Versions with Velcro pads are also available, allowing the pads to be changed flexibly and adapted to the respective requirements. This means that there is a suitable solution for every application, whether for precise work, sensitive surfaces or robust use.

The recessed handle makes it easy to reach even hard-to-reach areas. The combination of ergonomic design and versatility makes the DESIGN-LINE SERIES a reliable companion in trade, industry and hobby applications.

TOOLS FOR EPOXY

We offer a specially coordinated range of high-quality tools for working with epoxy resin grout: grout boards with special coating, tile washing boards with viscose covering, polyester sponges for cleaning and fleece pads – perfectly coordinated for demanding epoxy grouting work.

Epoxy grouts differ significantly from cementitious alternatives: they are acid-resistant, very hard and, if used improperly, quickly leave streaks or residues. Therefore, tilers need suitable tools – with acid-resistant special coatings that are also flexible enough to work precisely and thoroughly.

Our grout board is equipped with a fine, acid-resistant rubber coating that is ideal for epoxy grouts and natural stone. The bevelled edges ensure even distribution and prevent overcoating at the edges.

The range is complemented by tile washing boards with viscose grid sponges: these offer excellent cleaning and absorbency properties as well as high chemical and acid resistance. This allows epoxy resin residues to be removed quickly and the surface to be cleaned thoroughly.

Polyester sponges and fleece pads are ideal for fine cleaning: they enable thorough cleaning of sensitive surfaces. The replaceable fleece modules extend the service life of the tool and offer lasting flexibility.

TOOLS FOR EPOXY

TILING HAWK „SHORE-A85“

With a highly flexible, acid-resistant special coating, for epoxy grout, hard version

Unit	Dimension cm	Order No.
25	10 x 25	50 10 26

KNEE PROTECTORS

Our knee pads are certified according to DIN EN 14404 and comply with PPE standards.

The performance level of knee pads is determined solely by their resistance to puncture and pressure distribution. There are 4 performance levels.

Level 0

Knee pads that offer no protection against puncture and provide a pressure distribution of less than 30N when tested on a smooth, flat surface.

Level 1

Knee protectors that offer protection against puncture at a force of at least 100N and provide a pressure distribution of less than 30N when tested on a smooth, flat surface.

Level 1U

Knee pads that offer protection against puncture at a force of at least 100N and provide a pressure distribution of less than 30N when tested on an uneven surface.

Level 2

Knee pads that offer protection against puncture at a force of at least 250N and provide a pressure distribution of less than 30N when tested on an uneven surface.

loose in box	
24	50 11 00

SMOOTHING SPATULA "UNIFIX"

Highly-flexible, acid-resistant special synthetic material, maintains temperature, retains flexibility even at low temperatures, has a wide range of applications thanks to its' triangular base with convex crown, with both arched and straight edge, suitable for all grouting materials (silicon, acrylic, etc)

Unit	Order No.
50	50 12 10

SMOOTHING SPATULAS "SILISET" SET ON PASTE BOARD-CARD

Practice-oriented templates for fast and clean smoothing of silicon and acrylic grout.

- 1 smoothing spatula for hollow fillet joints
 - radius 4 mm, 8 mm, 10 mm
- 1 smoothing spatula for angular joints
 - angel 5 mm, 9 mm, 11mm

DOC DUST FREE

The development team at Kronen-Hansa is attracting peoples interest with an innovative product that will bring advantages for every tiling company: The DocDustFree. It is literally a "Doctor-dust-free" in the truest sense of the word, which takes the horror out of dust when cutting tiles.

The handy device is a cutting table for placing tiles and slabs in order to cut the ceramic as dust-free as possible with an angle grinder. This is achieved in combination with a Hoover that is to be connected. The support body with four stable feet at the corners ensures a firm stand.

Support arms attached to the side of the base body can be folded out with a length of 41 cm and spread up to 225 degrees. This results in a support tableau 115 cm in one direction and 134 cm in the other, a total of over one square metre.

If the support arms are no longer needed, they can simply be folded back in. The elements lock automatically and, when folded, are once again one unit with the base body for safe transport.

In practice, it quickly becomes clear to every user how effective this type of dust reduction is. In order to be able to use the most common hoovers, a reduction adapter is included in the accessories. The conical shape of the adapter Hoover hoses with diameters between 25 and 42 mm diameter are safely connected.

TILE LAYERS WASHING SETS - WASCHBOY

MORE ON **YOUTUBE**

Discover the new generation of tile washing set, our new Waschboy! This product is perfect for tilers and offers a variety of innovative features that will make your work easier. Our improved features simplify and speed up tile cleaning and washing.

FEATURES

Overall height reduced with the same volume of 22 l

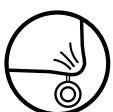

Stability is improved by lowering the center of gravity

Wider rounded feet for a firmer footing on uneven surfaces

Recessed grip on the front supports better handling

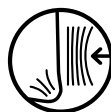

Integrated bracket for wheels

Easier to clean due to rounded bucket walls

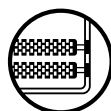

Deeper squeezing grid for a non-slip stand

Constructive adjustment of the side walls guarantees maximum stability

Closed bucket rim to easily mount other available washing rolls

Dual metal bearing roll holder in the edge of the bucket

Locks in the edge of the bucket ensure that the lid is securely in place when transporting liquids

This product was developed, manufactured and patented in Germany
